

We ask for patience during this time as we are trying to monitor all established guidelines so leadership can make the best informed decision during these unprecedented times. At this time we will **not open on May 4th**. The pharmacy will be open via drive thru only the week of May 4th-8th, and we will also have a couple of nurses and doctors onsite. For emergencies or needs to see a physician please call: **251-368-8630 or ext. 2300**. WIC staff will also be onsite during the week of the 4th and will be available by appointment only. We will provide a weekly update going forward, but please remember if you are called to return to work you should be available within 24 hours or sooner if needed. We ask that each of you continue to follow CDC guidelines, stay at home orders, wear face masks, wash hands, and adhere to social distancing during this time in order to flatten the curve. We look forward to the day we can enjoy some state of normalcy within our operations at PCI.
