

Dennis Begos Grant

The **Dennis Begos Grant** was established by general surgeon Dennis Begos to support students who want to pursue a career in the medical field.

Dennis Begos is a general surgeon who has decades of experience in the medical field.

Dennis Begos is currently the president of medical staff at Winchester Hospital. Previously, he held the position of Chairman of the Department of Surgery for ten years.

Dr. Dennis Begos, M.D. completed his general surgery residency at Yale University. In his final year at Yale, he became the Chief Resident. Afterwards, he pursued a one-year fellowship at Cleveland Clinic, specializing in rectal and colon surgery. There, he worked with some of the best doctors, not only in the field, but also in the world.

Dennis Begos is respected for his dedication to advancing the medical community. As such, he is also dedicated to offering financial help to a deserving US student. He is well regarded in the medical field profession because of his commitment to helping students from low-income backgrounds who otherwise would not be able to afford a medical education.

Dennis Begos is a renowned rectal and colon specialist practicing in Stoneham, Massachusetts, and is associated with other several hospitals in the region as well. Dennis Begos has worked in the healthcare industry for over two decades. He specializes in the detection and treatment of the lower digestive area of patients, including the diagnosis of colon cancer.

Dennis Begos knows that it is next to impossible for many students who do not come from affluent backgrounds to afford the cost of higher education, much less medical school, in the United States. For many students, even receiving loans does not help them much, since they are required to pay back loans and accrue interest. This is why Dennis Begos initiated the Dennis Begos Grant, an award based on talent and merit.

The expenses associated with an advanced education degree in the US are ever-increasing. Students are often forced to choose between pursuing their dreams of becoming a medical professional and taking on thousands of dollars of debt or pursuing another career that is less costly. To alleviate this burden, Dennis Begos is offering the amount of \$1,000 to the most deserving student in the country.

The Dennis Begos Grant program has been designed to specifically help low-income students in the US who want to pursue higher education. Dr. Dennis Begos knows that the cost of education is a burden that no lower-income student should bear.
