

GED TESTING SERVICE

We are excited to announce that the [online GED test in Spanish](#) and online retakes are now available. Students can complete their GED credential even if in-person testing is not an option.

Online Testing

Students will need to have the following prepared beforehand:

- A quiet, private room to take the test.
- A computer with webcam, sound and microphone, as well as a reliable internet connection.
- A “green” score on the [GED Ready practice test](#) within the last 60 days is required in order to schedule an online test.

The test is in Spanish, but the check-in process is in English. Please share this step-by-step Spanish language [video](#) with students to become familiar with the check-in process.

Students can find out more about individual eligibility and next steps for scheduling the test by logging in at [GED.com](#).

Retakes

We have updated our online testing capabilities to allow online retakes of the GED test. Students no longer have to go to a test center for a retake. Retakes can be scheduled in student accounts.

Please keep in mind that after two online attempts, any additional online retakes require a 60-day waiting period.
