

SmartMeasurement's Dream for a Better Future: Student Scholarship for 2018

SmartMeasurement has been the leader in manufacturing flow meters. With over 25 years in the industry, it is easy for a company to produce exactly what the consumers need. We have been providing the best-designed solutions for industries with the help of highly trained engineering teams. SmartMeasurement has been making a plethora of flow meter types including ultrasonic flow meters, magnetic flow meters, positive displacement flow meters and variable area flow meters with precision for the greater part of past two decades. SMC currently provides all customers with the online stream with a neutral analysis of an array of different flow engineering techniques and innovations. We also specialize in providing online information to your consumers about the kind of technology they should be using, product specifications, design principles and fluid characteristics. We take pride in providing objective technical information that does not favor one flow tech over another.

SMC's glorious history dates back to 2002 as the supplier of flow measurement instrumentation. Since the finding of the company, we have made our presence felt in over 25 countries. We specialize in regional quality control and excellent customer care. With our 25+ years of engineering experience in the niche, we are able to provide our consumers with superior value products and an extensive choice between flow measurement technologies. Now, we are looking for a student prodigy, who excels in designs of flow engineering application models and developing a better method of bias-free analysis of customer-side flow measurement technologies. We will award one promising young innovator a whopping USD \$1,000 prize money (scholarship), which they can use to pay off their tuition fees for school, college or university.

Who can apply for the SMC Student Scholarship 2018?

Eligibility criteria for applying –

- You need to be studying in high school, trade school, a recognized college or university in the USA.
- You need to be a citizen of the United States of America.
- You need an average GPA of at least 3.0 for applying.

The verification process –

SMC will verify your credentials once you are shortlisted for the scholarship. Since only ONE application usually wins the scholarship amount, we are very thorough when it comes to verifying the credentials and details provided by our winning applicant after the selection process.

How to apply –

Send a short, sweet and exciting video. Give us a brief introduction about yourself and your interest in flow engineering technology. Tell us why you think you should get the USD \$1,000 scholarship from SMC.

Do not forget to include the following points in your video as well –

- i. How do you plan to address the different need of flow technologies to satisfy our wide range of customers from all kinds of industries?
- ii. Do you have a working model of flow meters, industrial flow measurement instruments, and other related utilities?
- iii. Do you have a proposal for the improvement of our technical infrastructure (Smart Matrix™)?

Make us laugh, make us cry and make us think why. Keep the video short, 8-10 minutes long would suffice. Please stick to standard video formats including AVI, WMP, MP3, MP4, and MOV. Pay attention to quality and content. Please do not send written applications or send applications via post. Email us at scholarship@smartmeasurement.com as soon as the entries open for 2018.

Each applicant can send only one video application. So make sure you get it right the first time. Mail us at the given email id only. We will not consider any applications we receive on our customer care email or personal emails.

Important dates you should take note of –

Here are a few dates for the oncoming scholarship contest, you simply cannot forget –

- The entries open on March 2018.
- The deadline for sending in your application is on 31 March 2018, midnight.
- All applications we receive after 31 March 2018 will be considered void.
- SmartMeasurements will announce the winner on 15 April 2018.

We will contact the winner directly via email. In case the winner does not respond within the stipulated time, we will choose the next best candidate as the winner of our USD \$1,000 scholarship for 2018.

Added scholarship information you need to know before applying –

Our 2017 SMC student scholarship is already in motion. The entries are closed, and the winner has already been declared. The entries for the 2018 scholarship open next year, as mentioned above.

Winners will receive the scholarship amount at the beginning of their 2018 school/college academic session. The winner can use the money for the following purposes –

- To pay off your tuition fees.
- To pay for education-related expenses in school and college.

There is only one winner per year. So buckle up, the competition is going to be a tough one. Send in your application as soon as the process opens.
