

## New Tribal Member Health Benefit

A new health benefit has been approved for all PCI Tribal Members. The benefit is a mail-order maintenance prescription drug program. This mail order program allows members to have maintenance medications delivered to their home. Maintenance medications are drugs taken for ongoing medical conditions like diabetes, high blood pressure and asthma. All members using maintenance medications are eligible for this program at no cost to the member.

The program will be administered by Rx Benefits/Caremark. In August, enrollment forms will be mailed to all members, along with details of the program. Completed enrollment forms received by September 10<sup>th</sup> will ensure participation in the program with an effective date of October 1<sup>st</sup>. However, this program allows ongoing enrollment; therefore, members may enroll at any time. Once enrollment forms are received, "Welcome Packets" will be mailed directly to the member from Caremark . The packet will contain an explanation of the benefit plan, a card and mail order forms. Members will need to confirm their maintenance drug prescriptions have been written to dispense 90 day supply in order to receive a 90 day supply via this plan.

For questions or concerns related to this Mail-order Maintenance Drug Program, please refer to the Tribal Member Benefits Department (251)368-9146 Ext. 2209.
