

## Free Online Program for Kindergarten Students

Starfall.com is an online kindergarten program designed to help children learn to read, to improve their math skills, and to use the computer. The program sounds out each word and then pronounces the word. Activity pages can be downloaded and printed for your child to practice what they have learned. If you want to provide your child with additional practice there is a home version that you can purchase for \$35 for 365 days.
