

## Online Colleges Database

The database site is interactive; students can search for an online college that best fits their needs. The program allows students to search for colleges by state, tuition costs, types of programs of study offered and the colleges whose students earn the highest paying salaries upon graduation.

Tyler Bartoo, of Communications & Partnerships, provided the program information to our Tribe. The website is [www.onlinecollegesdatabase.org](http://www.onlinecollegesdatabase.org).
