

Diversity in Research and Engineering of Advanced Materials (DREAM) Training

The Diversity in Research and Engineering of Advanced Materials (DREAM) Training program, sponsored by the Air Force Research Lab Munitions Directorate (AFRL RW) at Eglin Air Force Base provides African American students the opportunity to enhance their research experience in Science and Engineering.

“Participating in DREAM allowed me to learn a lot about materials science and research that I had no prior knowledge of. This program allowed me to gain a better understanding of what conducting research consists of, and I am looking forward to being apart of the growing technology industry of today.”

ELIGIBILITY

- ◆ U.S. citizenship or permanent residency
- ◆ African-American
- ◆ STEM disciplines (undergraduate and graduate students)
- ◆ Minimum GPA of 3.2

HOW TO APPLY

- ◆ Complete application at <http://www.eng.fsu.edu/dream/apply.html>
- ◆ Submit current transcript and resume
- ◆ Two letters of recommendations are required

AWARD

- ◆ Stipend
- ◆ Travel allowance of \$500
