

MACULAR DEGENERATION AWARENESS

Age-related macular degeneration (AMD) is a disease that blurs the sharp, central vision you need for “straight-ahead” activities such as reading, sewing, and driving. AMD affects the macula, the part of the eye that allows you to see fine detail.

AMD causes no pain.

Having a dilated eye exam
can detect

Macular Degeneration.

Our office hours are 7:30 - 5:00

Monday - Friday
